

## Accelerating Innovation at WHOI

AVAST supports WHOI's vision for innovation in ocean technology, science, and education by providing the resources to create and pursue cutting-edge collaborative projects and programs. Although its name reflects WHOI's longstanding excellence in Autonomous Vehicles and Sensor Technologies, AVAST serves a broad range of users seeking to accelerate new ocean technology and research, to educate the next generation of ocean technologists and scientists, and to apply WHOI's unique expertise to key societal challenges. AVAST celebrated its successful first year at an Open House in September 2022, in WHOI's new David Center for Ocean Innovation.
