Dive Technologies

Dive Technologies' Mission

Build a best-in-class, long range, infinitely customizable AUV to explore the remaining 90% of the world's oceans at a disruptive price

“DIVE-LD” - available to the market in mid-2020

Team: Deep industry experience delivering innovation

- Founding team previously built AUVs for Bluefin Robotics/General Dynamics
- Saw a major market gap that required innovating on the AUV platform to deliver on long range and flexibility at low cost
- Started Dive Technologies in 2018 to seize a massive growth opportunity in both the defense and commercial markets

Jerry Sgobbo, CEO

- Former Knifefish Program Manager
- Former career Coast Guard Officer

Bill Lebo, CTO

- Former Product Manager of Bluefin 21 AUV platform
- Industry-recognized AUV expert

RUTGERS

Sam Russo, COO

- Former Knifefish Deputy Program Manager
- Former Army Blackhawk pilot

WEST POINT®

-
- Quickly assembled a lean team of five AUV engineering experts as consultants
 - Established a two-year sponsored research agreement with a leading AUV Lab to support core IP development
 - Advised by a retired U.S. Navy Rear Admiral and a former robotics company President that recently led the company to an acquisition

-
- Innovating on platform cost through novel physical structure and systems engineering architecture
 - Innovating on operational cost with long endurance and long range
 - Innovating on business model by offering Robot-as-a-Service

Vision

By 2023, Dive Technologies will have successfully developed an industry leading AUV platform

- Our AUV platform will be nimble with an architecture that will endure the test of time
