# HABby Clam Card Game: Datasheet

Record the percent toxicity of your clam in each month.

	Year 1	Year 2	Year 3
March			
April			
May			
June			
July			
August ☐			
September ☐			
October ☐☐			
November ☐☐			

Graph the toxicity of your clam over time. Use a different color for each year.

<b>Percent Toxicity</b>	<b>Symptoms</b>
0 - 20 %	No symptoms
20 - 40 %	Tingling lips and tongue
40 - 60 %	Dizziness, numbness in fingers and toes
60 - 80 %	Trouble moving arms and legs, vomiting
80 - 100 %	Difficulty breathing, respiratory support needed

Reflection questions:

What symptoms did your clam give the person who ate it?

In what scenario did your clam become the most toxic? Why do you think this was?

What do you think would have happened if the storm had arrived later in the second year? What about in the third year?
